

Gabriel Ghoussoub

Full-Stack Engineer, AI-native · Java/Spring Boot, TypeScript · Insurance, Identity and Regulated Systems

Beirut, Lebanon (UTC+2) · Remote · ghoussoubgabriel@gmail.com · +961 81 398 752 linkedin.com/in/gabriel-ghoussoub · github.com/GabrielGhsoub · gabrielghsoub.com

SUMMARY

Full-stack engineer who builds production software in **Java/Spring Boot and TypeScript** and builds **with AI coding agents every day**: Claude Code in the loop, MCP servers and multi-agent tooling of my own, Claude and OpenAI APIs and LangChain, LLM features wired into real products. Five years on systems where a bug is an audit finding: two major US insurance carriers, a national digital identity programme, a commercial bank, and a satellite network operator. Distributed systems, reactive architecture, and CI/CD underneath; the judgement to know where AI-generated code is reliable and where it is not, on top.

Available for **contract and project-based engagements**.

SELECTED IMPACT

- **99.95%** system uptime across production services
 - **4 hours** → **15 minutes** deployment time (93% reduction) on a legacy insurance platform
 - **60%** less deployment overhead via Terraform + GitLab CI/CD
 - **40%** faster response under high-throughput load after a reactive re-architecture
 - **90%** test coverage; **60%** fewer post-deployment defects
 - **15+ hours/week** of manual analysis eliminated through an automated telemetry pipeline
 - Led cross-functional teams of up to **5** engineers, QA, and designers
-

EXPERIENCE

Software Engineer (L3), contract (*client confidential*)

Aug 2025 - Present · Remote

Property & casualty insurance.

- Full-stack development on Java Spring Boot microservices with React frontends
- Backend services and GraphQL APIs using Node.js, TypeScript, and Elixir, supporting distributed teams across 3 time zones
- Cloud infrastructure provisioning with Terraform; GitLab CI/CD pipeline orchestration

Lawyers Syndicate of Lebanon: Senior Software Engineer

May 2025 - Aug 2025 · Beirut (*fixed-term programme*)

National digital identity, delivered end to end in one engagement.

- Directed a cross-functional team of **5** engineers, QA specialists, and designers through the full product lifecycle
- Architected a secure dual-purpose digital identity card integrating **e-wallet, fee payment processing, and identity/access control** (Java, React)
- Built *eBareau*, a microservices web platform serving **15,000+ registered lawyers**, deployed via Jenkins CI/CD at **99.9% uptime**

Bcom (*client: Intelsat*): Software Engineer

Jul 2024 - May 2025 · Remote

Satellite network monitoring.

- Re-architected the **Inpulse** monitoring tool on a fully reactive stack (Java WebFlux, React), **40% improvement** in responsiveness under high-throughput data loads

- Engineered a data pipeline over MongoDB and PostgreSQL processing **terabytes** of satellite network telemetry, enabling AI-driven predictive analytics that cut **15+ hours** of manual analysis weekly

EmblemHealth (via Inspire Innovations): Java Software Engineer

Nov 2022 - Jun 2024 · Remote

Health insurance. One of the largest nonprofit health insurers in the US.

- Integrated a legacy monolithic **CAG application with a rules engine** into a BPM platform, migrating business logic to reactive **Spring WebFlux** microservices on Kubernetes
- Cut deployment time from **4 hours to 15 minutes**
- Authored a JUnit/Mockito test suite reaching **90% coverage** → **60% fewer** post-deployment defects
- Delivered through Agile sprints with a distributed team across 4 time zones (Azure DevOps), **95%** on-time completion

GCG (Ghoussoub Consulting Group): Software Engineer

2024 · Contract

- Designed an automated **IoT energy management system** with an Angular UI, delivering a **15% reduction** in energy costs through predictive analytics

Blom Bank: Java Developer Intern

Mar 2021 - Aug 2021 · Beirut

- Extended a Java Spring employee access management system with **20+ features** including role-based permissions and audit logging, improving security compliance

WonderEight Agency: Web Developer

2021 · Beirut

- Delivered **15+ client websites** (PHP, WordPress); built Python scrapers automating market-data collection

INDEPENDENT & CLIENT PROJECTS

- **Padel Lebanon:** booking, league management, and skill-based matchmaking platform for the Lebanese padel community. Live on the App Store and Google Play, plus a companion admin portal. *React Native, Expo, Supabase, TypeScript*
- **SEMS, Smart Energy Management:** multi-source energy monitoring (grid, generator, solar, battery) with real-time telemetry and per-device cost attribution. *NestJS, TimescaleDB, PostgreSQL, Redis, Socket.io, Expo*
- **Healthcare PDF API:** document processing service for healthcare records
- **BreatheBreak:** native macOS menu-bar utility with session logging and CSV export. *SwiftUI, AppKit, SwiftData*
- Additional shipped work: VoxFlow (offline-first mobile), a Chrome extension, and AI agent tooling

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, Elixir, C#, Swift, SQL **Backend:** Spring Boot, Spring WebFlux, NestJS, Node.js, GraphQL, Hibernate **Frontend:** React, Next.js, Angular, Tailwind CSS **Mobile:** React Native, Expo, SwiftUI **Data:** PostgreSQL, TimescaleDB, MongoDB, MS SQL Server, MySQL, MariaDB, Redis, dbt **Cloud & DevOps:** AWS, Terraform, Kubernetes, Docker, Helm, Jenkins, GitLab CI, GitHub Actions, Ansible **AI:** Claude API, OpenAI, LangChain, multi-agent systems **Practices:** Microservices, event-driven architecture, TDD, Agile/Scrum

EDUCATION

Bachelor of Engineering, Computer & Communications Engineering: Antonine University, 2021
